REQUEST FOR RECONSIDERATION

Honorable Sir:

This is a response to the final Office action dated December 26, 2002 (Paper No. 5), the shortened statutory period for response being effectively extended to April 28, 2003 by the enclosed one-month Petition For Extension Of Time. Claims 1-15 are pending in the application. Favorable reconsideration is respectfully requested in light of the following Remarks.

1. The Office action rejects Claims 1, 3-8 and 10-15 under 35 USC §103(a) over

Lapohn (U.S. Patent No. 5,770,797, hereinafter "Lapohn") in view of Fordyce (U.S. Patent No. 4,646,673, hereinafter "Fordyce"). The rejection is respectfully traversed.

Independent Claims 1, 8 and 15 specify, *inter alia*, an air pressure measuring system comprising a bracket structure mounted to an inside surface of a wheel assembly.

Lapohn discloses a tire pressure indication system in which the valve assemblies 18 are fastened to the rear side of a hub cap 20. *See Figs. 1, 1A, 6 and 7; col. 3, lines 45-50.* Applicant agrees with the Office action that there is no mention in Lapohn of a bracket structure that is mounted to the inside surface of the wheel assembly by using adhesive tape. *See Paragraph 2.*

Fordyce discloses a device for indicating low tire pressure. Specifically, two devices 1 are mounted to the outwardly facing rear rim 3 of the outer tire 2a of the pair of tires 2a, 2b. *See Fig. 2; col. 3, lines 59-66.*

It is respectfully submitted that there is no mention in Fordyce of at least the feature of a bracket structure mounted to an inside surface of a wheel assembly, as recited in Claims 1, 8 and 15. Contrary to the Office action, the device 1 is mounted to an outwardly facing rear rim 3 as shown in Figure 2 of Fordyce, not to the inside surface of the wheel assembly, as shown in Figures 1 and 2 of the specification.

Mounting the air pressure indication system of the invention to the inside surface of the wheel assembly provides a commercial advantage over the Fordyce arrangement. In particular, in Fordyce, the air gauge protrudes from the wheel assembly, as shown in Figure 4. As a result, the air gauge can become dislocated from the wheel assembly in the event the outer rim of the wheel assembly scrapes against a rigid structure, such as a curb, or the like. By contrast, one of the advantages of the air pressure indication system of the invention being mounted to the inside of the wheel assembly is to prevent the dislocation of the indication system in the event the wheel rim scrapes against a curb, or the like.

Because the combination of Lapohn and Fordyce does not disclose, teach or suggest all the claim limitations, as recited in Claims 1, 8 and 15, the Office action fails to establish a *prima facie* case of obviousness. *See MPEP §2143.*

For at least this reason, Claims 1, 8 and 15 are allowable over the applied art. Claims 3-7, which depend from Claim 1, and Claims 9-14, which depend from Claim 8, are likewise allowable over the applied art. Withdrawal of the rejection is respectfully requested.

2. The Office action also rejects Claims 2 and 9 under 35 USC §102(b) over Lapohn and Fordyce, and further in view of Evans et al. (U.S. Patent Application Publication 2002/0139288 A1, hereinafter "Evans"). The rejection is respectfully traversed.

Applicant agrees with the Office action that there is no mention in Lapohn of the feature of a bracket structure that is mounted to an inside surface of a wheel assembly by using adhesive tape.

The filing date of Evans is March 20, 2001. The effective filing date of the present application is October 30, 2000. Thus, Evans is not prior art.

For at least this reason, Claims 2 and 9 are allowable over the applied art. Withdrawal of the rejection is respectfully requested.

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance. Favorable consideration and prompt allowance of the application is earnestly solicited.

Should Examiner Ferguson believe anything further would be desirable in order to place the application in better condition for allowance, the Examiner is invited to contact the undersigned attorney at the telephone number listed below.

It is believed that any additional fees due with respect to this paper have already been identified. However, if any additional fees are required in connection with the filing of this paper, permission is given to charge account number 18-0013 in the name of Rader, Fishman and Grauer PLLC.

Respectfully submitted,
